JL: There are many indications of things that can come in the Dallas LHO/Threat story the original of which I received today. (Not easy to copy. I also have several Houston stories.) It was easy to figure out that Aynesworth would be involved. Bonnie said he didn't think so but he is. He wrote a companion story that is quite helpful to the FBI in what is says and does not say. There are major implausibilities in the explanation but the papers ignore them. If aware of them....There is too much to do to try to cut and paste these stories now but I'll save them...Indications of orchestration: Waggoner Carr got a big Houston play on his charging that he had tried to get the feds to do a thorough investigation on the rumors of LHO as an agent. I read several by phone on radiox last night...The FBI's account of that letter isn't a very good one. They've taken the usual road, they are continuing to investigate it. HW 9/5/75
